

“Only CVe Monitors enable mold info to be retrieved from the tool, while alerting us that PM’s are due.”

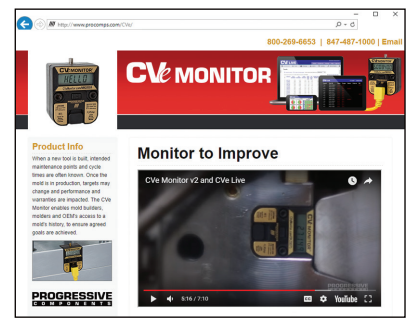

Chris Myers, Carson Tool & Mold

INFORMATION IS POWER

When mold builders ship a tool, they can deliver a mold that also has a memory.

- 16GB internal flash drive for prints and setup sheets
- Alerts notify when maintenance points are approaching
- Detailed reporting available to authorized users

CVe Monitors enable partnering with your customer to prevent unscheduled mold stoppages, for maximum production profitability for all.
